

Black King site visit 1st Oct 2024

This document established a record for FSVP compliance requirements of our site verification of Black King facility Fazenda Iracy.

Supplier and visit dates

- Supplier name: Black King
- Date: 1st Oct 2024

Facilities visited

- 1 cacao farms
- 1 cacao fermentation facility
- 1 cacao drying facility

Facilities

Facility A - Cacao farm

Geo location:

- Itamaraty, district of Ibirapitanga, KM 404, Bahia.

Observations

Visual Observation	Remarks

Only perfectly formed ripe cacao pods are harvested.

Infected cacao pods are observed left in the fields and not harvested

Method of handling to ensure against damage to cacao pod skin during harvest to prevent introduction of vectors for microbial growth on actual cacao fruit therein observed in use

Facility B - Fermentation facility

Geo location:

- Itamaraty, district of Ibirapitanga, KM 404, Bahia.

Observation

Visual Observation	Remarks
	<p>Fermentation is done in a wood box in the house of fermentation.</p> <p>Nothing else is allowed in the house besides the cacao nibs to be fermentation</p>
	<p>No visible signs containers holding pesticide or artificial chemicals were observed</p>

Facility C - Drying facility

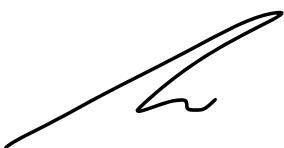

Geo location:

- Itamaraty, district of Ibirapitanga, KM 404, Bahia.

Observations

Visual Observation	Remarks
 A photograph showing the exterior of a large, semi-transparent plastic-covered greenhouse. The structure is supported by a metal frame and has a curved roof. The ground in front is dirt with some sparse vegetation.	There are no visible signs of containers containing pesticide or artificial chemicals on the premise
 A photograph taken inside the greenhouse, looking towards the back. It shows a long, rectangular black metal frame structure, possibly a drying rack or a series of shelves, supported by legs. The background is filled with green foliage and plants.	

Sincerely,
