

CEPOTX site visit [DATE OF VISIT]

This document established record for FSVP compliance requirements of our site visit to CEPOTX facility

Supplier and visit dates

Supplier name visited:	CEPOTX
Site name:	Santa Anna Fazenda (introduced by Jedielcio, CEPOTX)
Site code:	[TBD]
Date:	[DATE OF VISIT — to confirm]

Facilities visited

- 1 cacao farm
- 1 cacao fermentation facility
- 1 cacao drying facility

Facility A - Cacao farm

Geo location:

- Latitude: [LATITUDE — to confirm]
- Longitude: [LONGITUDE — to confirm]
- Google Map location: [LINK]

Observations

Visual Observation	Remarks
Microbial Contamination (salmonella)	Cacao trees observed bearing mature pods harvested from the tree (see evidence photo 2). [CONFIRM harvesting + Garra tool practice]
Insect Infestation	Organic cacao under CEPOTX program; natural organic repellents in use. [CONFIRM]
Foreign objects like rocks, dirt, or debris from the field	Beans extracted from pods at harvest; foreign-object removal performed during later drying/sorting stage (see evidence photo 1). [CONFIRM]

Facility B - Fermentation facility

Geo location:

- Latitude: [LATITUDE — to confirm]
- Longitude: [LONGITUDE — to confirm]
- Google Map location: [LINK]

Observation

Visual Observation	Remarks
Inclusion of non-cacao materials in fermentation containers	Fermentation carried out in a wooden box (see evidence photo 3); the fermentation house is dedicated to cacao almonds only. [CONFIRM]
Contamination from pesticides or chemicals used in cacao plantations	Farm is organically certified under the CEPOTX program; no pesticides or artificial chemicals observed on the premise. [CONFIRM]

Facility C - Drying facility

Geo location:

- Latitude: [LATITUDE — to confirm]
- Longitude: [LONGITUDE — to confirm]
- Google Map location: [LINK]

Observations

Visual Observation	Remarks
Mold growth due to improper drying practices.	Beans spread on the drying-shed floor with frequent turnover (see evidence photo 1). [CONFIRM turnover schedule]
Inclusion of foreign objects during drying and sorting process	Dried almonds processed through a sieve before collection. [CONFIRM]
Residues from cleaning agents or pesticides	Organically certified facility; no cleaning-agent residues or artificial chemicals observed. [CONFIRM]

Site visit evidence photographs

Captured during the site visit to Santa Anna Fazenda (CEPOTX), 2026.

Photo 1 — Drying shed: man in teal polo inside an open-sided wooden drying shed with cacao beans spread on the floor; translucent corrugated roof; banana plants and cacao trees outside.

Photo 2 — Cacao farm: close-up of a cacao tree trunk with three ripening yellow-orange pods against leaf-littered ground.

Photo 3 — Fermentation facility: man leaning over an open wooden fermentation box, pointing at a small wooden crown-shaped device on the lid; rustic farm structures and vegetation in the background.

Video evidence frames — Facility A (cacao farm walk)

Extracted from walk in the forest.MOV (7.7s, 1920x1080, 30fps) recorded during the site visit; 31 frames extracted at 4fps, 3 representative frames shown.

Video frame 1 — Man in green shirt standing beside a cacao tree in the Amazonian forest, looking up at a large green cacao pod hanging from the trunk.

Video frame 2 — Man facing camera, right hand touching two cacao pods on the tree trunk; dense canopy and leaf-littered ground.

Video frame 3 — Man pointing at green-yellow ripening cacao pods growing directly from the tree trunk.

Sincerely,

Zhiwen Teh

President
