

CEPOTX site visit 9th September 2026 — Sítio Torres

This document establishes the record for FSVP compliance requirements (21 CFR 1.470–1.514) of our site visit to the CEPOTX facility at Sítio Torres — recorded on the farm as “Sítio 2” (plot code N-06-66), a member property of the COOPCAO cooperative (CEPOTX family), Pacajá/PA, on 9th September 2026. Evidence was captured on-site: 38 geotagged photographs, 35 locus-tagged walk videos and 8 artefacts, archived in the media-archive pipeline (farm_media_manifests/sitio-torres-pacaja-para.json + 20260909_pacaje_location_2_nursery.zip.archive.json).

Supplier and visit dates

- **Supplier name visited:** CEPOTX — Cooperativa Central de Produção Orgânica da Transamazônica e Xingu (Altamira/PA). FSVP registration VALID (FFR 14674182470)
- **Sub-cooperative:** COOPCAO (CEPOTX family)
- **Site name:** Sítio Torres (Pacajá, Pará) — recorded as “Sítio 2”
- **Site code:** N-06-66 (CEPOTX site code — read from on-site screenshot IMG_9694; confirmed with CEPOTX)
- **Registered owner / host:** Alexandre (CoopCao director-coordinator)
- **Date:** 9th September 2026 (media records 12:33–16:40 local; 38 photos, 35 videos)

Facilities visited

- 1 cacao farm (existing grove, enrichment planting)
- 1 cacao fermentation facility
- 1 cacao drying facility (sun drying)

Site characteristics

- **Location:** Pacajá, Pará, Brazil — Transamazônica region
- **GPS (media centroid):** –3.5298, –51.1451 (representative IMG_9673 EXIF, alt 83.2 m) · walk extent –3.5402...–3.5288, –51.1455...–51.1433
- **Area:** 4.5 ha claimed (cacao blocks); GPS walk hull 19.14 ha across the visited nursery + mature blocks
- **Cacao:** verdadeiro / híbrido + a small clonal block; blocks aged 2 / 4 / 5 years plus a >20-year block
- **Shade:** cumaru (native Amazon) planted through the grove
- **Sampling:** ≈120 kg sampled at visit; target first lot 600 kg

Facility A – Cacao farm (existing grove)

Geo location:

- Latitude: –3.5298
- Longitude: –51.1451
- Google Map location – <https://www.google.com/maps?q=-3.5298,-51.1451> (media centroid of plot N-06-66; representative IMG_9673 EXIF)

Observations

Visual Observation	Remarks
Microbial Contamination (salmonella)	Existing cacao grove walked and inspected on 09-Sep-2026 (videos IMG_9623, IMG_9624, IMG_9630). Managed organically under the CEPOTX/CoopCao IBD NOP system. Cacao verdadeiro/híbrido across blocks aged 2/4/5 yr plus a >20 yr block (Alexandre's narration, IMG_9624). Enrichment planting ("enriquecimento") into standing capoeira (IMG_9630).
Insect Infestation	Organic agroforestry under native shade — cumaru (native Amazon) planted through the grove (IMG_9623/IMG_9624). No pest outbreak observed during the walk.
Foreign objects like rocks, dirt, or debris from the field	Pods harvested selectively by hand; grove floor clear during the walk. No foreign-object contamination source observed at the harvest area.

Facility A – cacao grove, Sítio Torres (photo from 09-Sep-2026 site walk; one of the 38 archived HEIC originals).

Facility B – Fermentation facility

Geo location:

- Latitude: -3.5299
- Longitude: -51.1451
- Google Map location – <https://www.google.com/maps?q=-3.5298,-51.1451> (fermentation structure cluster; IMG_9673 captured 13:21:37, IMG_9677 13:22:07 local)

Observations

Visual Observation	Remarks
Undesirable Fermentation	Fermentation is carried out in a wooden box / vessel on-site, documented in photo evidence IMG_9673 (screened processing structure) and IMG_9677 (wooden fermentation vessel, 13:22 local), plus walk clip IMG_9678 (“fermentação... tanque... este aberto”). Regime details (box construction, days, turning) to be confirmed — [PENDING].
Inclusion of non-cacao materials in fermentation containers	Only cacao beans are placed in the fermentation vessel; the structure is dedicated to cacao (IMG_9673/IMG_9677 + IMG_9678 walk-through). No non-cacao material observed in the container during the visit.
Contamination from pesticides or chemicals used in cacao plantations	The property sits within the organically certified (IBD NOP) CEPOTX/CoopCao system; no pesticide or artificial chemical use, and no chemical containers, observed on the premises during the walk.

Facility B – screened processing structure with fermentation vessel area, Sítio Torres – IMG_9673.HEIC, captured 09-Sep-2026 13:21:37 local, GPS -3.5298, -51.1451 (alt 83.2 m).

Facility B – wooden fermentation vessel (barrel/box), Sítio Torres – IMG_9677.HEIC, captured 09-Sep-2026 13:22:07 local, GPS –3.5299, –51.1451 (alt 86.5 m).

Facility C – Drying facility

Geo location:

- Latitude: –3.5298
- Longitude: –51.1451
- Google Map location – <https://www.google.com/maps?q=-3.5298,-51.1451> (sun drying area at the site processing cluster)

Observations

Visual Observation	Remarks
Mold growth due to improper drying practices	Sun drying (“secagem”, IMG_9703) is carried out on-site in the open air. No mold observed at the time of visit. Dedicated drying-surface details to be confirmed — <i>[PENDING]</i> .
Inclusion of foreign objects during drying and sorting process	Beans dried and sorted on-site; no debris or foreign objects observed. Dedicated clean drying surface to be confirmed — <i>[PENDING]</i> .
Residues from cleaning agents or pesticides	Property within the organically certified (IBD NOP) CEPOTX/CoopCao system; no cleaning-agent or pesticide residue sources observed at the site premises.

Sítio Torres – cacao plant growth: young cacao tree in vegetative stage (dense oblong-leaf canopy, slender trunk) within the grove – IMG_9682.HEIC, captured 09-Sep-2026 13:27:44 local, GPS –3.5298, –51.1451.

Sincerely,
