

CEPOTX — Cleide Factory

FSVP Site Inspection Record · TrueSight DAO / Agroverse

For: FDA FSVP compliance — TrueTech Inc (Importer of Record, EIN 88-3411514)
From: TrueSight DAO / Agroverse — verified on-site inspection record
Date: 8 September 2026 (photos 15:56–17:00 local)
Status: Facility completed — inspected post-construction, equipment operational
Site: Fazenda Cleide — Cleide Maris Suk — site code B-06-108 (CEPOTX / COOPOXIN)

1. Supplier and visit dates

- **Supplier name visited:** CEPOTX
- **Site name:** Cleide Maris Suk
- **Site code:** B-06-108
- **Date:** 8th Sept 2026

2. Facilities visited

#	Facility	Evidence
A	Cacao fermentation facility	Photo: fermentation_tank.jpg
B	Cacao roaster	Photo: roaster.jpg
C	Winnowing & cracking facility	Photo: winnowing_and_cracking.jpg
D	Melanger (chocolate mass grinding)	Photo: melanger_1.jpg
E	Cacao juice (honey) press	Photo: cacao_juice_oress.jpg
F	Chocolate moulding (bars)	Photo: chocolate_mold.jpg
G	Fridge / cold-hold (finished chocolate)	Photo: fridge.jpg
H	Storage facility	Photo: storage.jpg

This document establishes the record for FSVP compliance requirements of our site visit to the CEPOTX Cleide facility. Each facility below lists the geo location, the preventive controls in place, and the observations examined on site.

Facility A — Cacao fermentation facility

Fermentation in dedicated tank on premise; nothing else processed in the fermentation house. Premise is organically certified - no pesticides or artificial chemicals on site.

Geo location: Latitude -3.4140667 · Longitude -52.6346889 · Google Map location

Visual observation	Preventive control	Examined	Remarks
Microbial contamination / undesirable fermentation	Dedicated fermentation tank; smell / pH / professional taste batch checks (pH 4.8-5.8 target).	Tank observed clean, dedicated to cacao.	Visual observation confirmed.
Chemical cross-contamination	Organic premise; no pesticides / artificial chemicals allowed.	No chemical containers observed in fermentation area.	Visual observation confirmed.

Photo evidence — Cacao fermentation facility (8 Sept 2026)

Facility B — Cacao roaster

Batch roaster. Roasting process kills off microbial growth - internal cacao nib temperature reaches 180°C for 30 minutes.

Geo location: Latitude -3.4140667 · Longitude -52.6346889 · Google Map location

Visual observation	Preventive control	Examined	Remarks
Microbial survival during roasting	Roast nibs to 180°C internal for 30 min.	Roaster observed in working order; temperature/time verified on unit.	Roasting kills microbial growth.
Equipment hygiene & maintenance	Daily cleaning; full maintenance yearly, parts quarterly; repairs before next batch.	Machine observed clean, good working order.	Confirmed.
Sealing / foreign objects	Stove sealed during roasting; regular seal maintenance.	Equipment observed sealed during operation.	Confirmed.

Photo evidence — Cacao roaster (8 Sept 2026)

Facility C — Winnowing & cracking facility

Cracker + winnower remove shell fragments after roasting; only cacao nibs processed here.

Geo location: Latitude -3.4140667 · Longitude -52.6346889 · Google Map location

Visual observation	Preventive control	Examined	Remarks
Shell fragments in nibs	Automated cracking + winnowing; visual inspection & sieving.	Winnower/cracker observed in use; shell removal automated.	Only cacao nibs processed.
Allergen / cross-contact	Clean & sanitize between batches; cacao only.	No other materials observed processed.	Confirmed.
Personnel hygiene	Workers wear hair mesh and gloves.	Hair mesh observed worn.	Confirmed.

Photo evidence — Winnowing & cracking facility (8 Sept 2026)

Facility D — Melanger (chocolate mass grinding)

Grinds roasted nibs to liquid chocolate mass (conching/refining).

Geo location: Latitude -3.4140667 · Longitude -52.6346889 · Google Map location

Visual observation	Preventive control	Examined	Remarks
Metal contamination	Proper maintenance, metal detection; sealed during operation.	Machine good working condition; no metal fragments in cacao mass.	Confirmed.
Hygiene between batches	Daily cleaning; openings sealed between uses.	Machine observed clean and sealed when idle.	Confirmed.

Photo evidence — Melanger (chocolate mass grinding) (8 Sept 2026)

Facility E — Cacao juice (honey) press

Press extracts cacao juice / honey from fresh pulp.

Geo location: Latitude -3.4140667 · Longitude -52.6346889 · Google Map location

Visual observation	Preventive control	Examined	Remarks
Microbial contamination	Regular cleaning & sanitizing of press; approved rinse agents.	Press observed clean; no visual contamination.	Confirmed.
Chemical cross-contamination	Juice extraction isolated from chemical processes.	No evidence of cross-contamination.	Confirmed.
Foreign objects	Screens / filters; regular equipment inspection.	No foreign objects observed in juice.	Confirmed.

Photo evidence — Cacao juice (honey) press (8 Sept 2026)

Facility F — Chocolate moulding (bars)

Tempered chocolate mass poured into moulds to form bars.

Geo location: Latitude -3.4140667 · Longitude -52.6346889 · Google Map location

Visual observation	Preventive control	Examined	Remarks
Hygiene practices	Gloves / masks; regular cleaning & sanitizing of moulds and area.	Moulding area clean; no visual contamination.	Confirmed.
Allergen / cross-contact	Facility processes cacao/ chocolate only.	No non-cacao materials observed.	Confirmed.
Foreign objects	Inspect moulds; food-grade moulds.	No foreign objects observed in finished bars.	Confirmed.

Photo evidence — Chocolate moulding (bars) (8 Sept 2026)

Facility G — Fridge / cold-hold (finished chocolate)

Temperature-controlled hold for tempered / cooled finished chocolate.

Geo location: Latitude -3.4140667 · Longitude -52.6346889 · Google Map location

Visual observation	Preventive control	Examined	Remarks
Temperature control	Monitor & maintain storage temperature within specified range.	Fridge operating; temperature within required range.	Confirmed.
Contamination / odours	Separate from strong-smelling products; sealed packaging.	Finished product stored sealed; no off-odours.	Confirmed.
Hygiene	Regular cleaning; inspect containers.	Storage clean; containers undamaged.	Confirmed.

Photo evidence — Fridge / cold-hold (finished chocolate) (8 Sept 2026)

Facility H — Storage facility

Storage of raw material, packaging and finished goods.

Geo location: Latitude -3.4140667 · Longitude -52.6346889 · Google Map location

Visual observation	Preventive control	Examined	Remarks
Pest / foreign objects	Store off floor, sealed packaging; regular inspection.	Storage tidy; packaging sealed; no pests observed.	Confirmed.
Chemical cross-contamination	Food storage isolated from chemicals.	No chemicals in food storage area.	Confirmed.
Hygiene & housekeeping	Regular cleaning & sanitizing of storage area.	Area clean and organised.	Confirmed.

Photo evidence — Storage facility (8 Sept 2026)

Declaration

I hereby attest that the information recorded in this report was verified during an on-site visit to the Cleide factory (site code B-06-108), Cleide Maris Suk property, CEPOTX / COOPOXIN member, Pará, Brazil, on 8 September 2026. The visit documented the completed bean-to-bar facility: fermentation, roasting, winnowing & cracking, melanger, cacao juice press, chocolate moulding, cold-hold fridge and storage. Photographic evidence with embedded GPS was captured at the time of the visit (all photographs geo-tagged to the facility complex).

Sincerely,

Zhiwen Teh

President

TrueTech Inc (EIN: 88-3411514)
