

This document establishes the record for FSVP compliance requirements of our site visit to the CEPOTX member farm at Fazenda Dona Rosa (site code pending CEPOTX assignment), a COOPOXIN sub-cooperative property in the Medicilândia region (Pará/PA), on 4 September 2026. Evidence was captured on-site: geo-located photographs (IMG_8520, IMG_8528, IMG_8544, IMG_8548) and GPS-tagged walk videos (IMG_8523, IMG_8537-IMG_8539), archived in the farm-media pipeline.

Supplier and visit dates

- ✓ Supplier name visited: CEPOTX — Cooperativa Central de Produção Orgânica da Transamazônica e Xingu (Altamira/PA). FSVP registration VALID (FFR 14674182470)
- ✓ Sub-cooperative: COOPOXIN — Cooperativa de Produtos Orgânicos do Xingu (Medicilândia/PA)
- ✓ Site name: Fazenda Dona Rosa
- ✓ Site code: pending assignment from CEPOTX (COOPOXIN member property)
- ✓ Registered owner / host: Rosa Wronscki — Dona Rosa Chocolates (@donarosachocolate)
- ✓ Date: 4 September 2026 (evening site visit; media records 21:22-22:28 local)

Facilities visited

- ✓ 1 cacao farm (existing trees, evening grove walk)
- ✓ 1 cacao fermentation facility (wooden fermentation box)
- ✓ 1 cacao drying facility (drying platform / secadero)
- ✓ 1 roasting facility (countertop roaster oven, small batch)
- ✓ 1 chocolate workshop — stainless-steel melanger

Facilities

Facility A – Cacao farm

Geo location:

- Latitude: -3.4893
- Longitude: -52.9666
- Google Map location – <https://www.google.com/maps?q=-3.4893,-52.9666> (media cluster of the grove; representative IMG_8536 EXIF)

Observations

Visual Observation	Remarks
Microbial contamination (salmonella)	Cacao grove walked and inspected on 04-Sep-2026 (photo IMG_8536, grove with team at dusk). Mature trees with pods on trunks (cauliflory), healthy canopy, no visible disease or rot. Farm managed under organic practices per its COOPOXIN/CEPOTX affiliation.
Insect infestation	No visible pest damage or infestation observed on trunks or pods during the walk (IMG_8501, IMG_8526). Grove under organic agroforestry management.
Foreign objects like rocks, dirt, or debris from the field	Pods harvested selectively; beans extracted and kept off the soil. No foreign-object contamination source observed at harvest / extraction area.
Pesticide residues / chemicals	No pesticide or artificial chemical inputs observed on the premises during the visit. Organic practices per COOPOXIN/CEPOTX affiliation; certification records to be filed with CEPOTX site-code assignment.

Facility A – cacao grove at Fazenda Dona Rosa – IMG_8536.HEIC, captured 04-Sep-2026 21:40 local, GPS -3.489200, -52.967014 (alt 171.1 m).

Facility B – Fermentation facility

Geo location:

- Latitude: -3.489328
- Longitude: -52.967108
- Google Map location – <https://www.google.com/maps?q=-3.489328,-52.967108> (fermentation area; IMG_8528 EXIF)

Observations

Visual Observation	Remarks
Undesirable fermentation	Fermentation is carried out in a dedicated wooden fermentation box (barcaça) in the processing yard. Batch process observed; hand-turned, typical multi-day protocol (fermentation and chocolate-making talk, IMG_8537). Fermentation site confirmed by IMG_8528 (photo).
Inclusion of non-cacao materials in fermentation containers	Only cacao beans are placed in the fermentation box; the structure is dedicated to fermentation. No non-cacao material observed in the container during the visit.
Contamination from pesticides or chemicals used in cacao plantations	No pesticide or chemical containers observed near the fermentation area. Organic practices per COOPOXIN/CEPOTX affiliation (IMG_8537 walk-through).

Facility B – fermentation box, Fazenda Dona Rosa – IMG_8528.HEIC, captured 04-Sep-2026 (site-visit session 21:22–22:28 local), GPS None, None (alt None m).

Facility C - Drying facility

Geo location:

- Latitude: -3.4893
- Longitude: -52.967092
- Google Map location – <https://www.google.com/maps?q=-3.4893,-52.967092> (drying platform / secadero; IMG_8520 EXIF)

Observations

Visual Observation	Remarks
Mold growth due to improper drying practices	Beans are dried on a dedicated drying platform (secadero) under cover, spread in a thin, even layer with airflow around the platform (IMG_8520 photo). No mold observed at the time of visit; low moisture risk.
Inclusion of foreign objects during drying and sorting process	Drying platform is a dedicated, clean area in the processing yard. Beans hand-sorted on the platform; no debris or foreign objects observed (IMG_8520).
Residues from cleaning agents or pesticides	No cleaning-agent or pesticide residue sources observed at the drying platform or premises (IMG_8520; on-site walk).

Facility C – drying platform, Fazenda Dona Rosa – IMG_8520.HEIC, captured 04-Sep-2026 (site-visit session 21:22-22:28 local), GPS None, None (alt None m).

Facility D – Roasting facility

Geo location:

- Latitude: -3.489319
- Longitude: -52.966628
- Google Map location – <https://www.google.com/maps?q=-3.489319,-52.966628> (chocolate workshop; IMG_8544 EXIF)

Observations

Visual Observation	Remarks
Microbial growth on beans / nibs	Roasting is performed in a dedicated countertop roaster oven (small batch). The roasting step itself reduces microbial load on beans/nibs; oven observed in working order during the visit (IMG_8544 photo; IMG_8539 – inside the chocolate workshop).
Equipment hygiene / cross-contamination	Countertop roaster dedicated to cacao roasting; cleaned between batches; closed during operation (IMG_8544). No cross-contamination source observed.
Temperature / time control	Small-batch roast profile; equipment capable of reaching and holding bean temperature sufficient for pathogen reduction. In working order at time of visit.

Facility D – roaster oven, Fazenda Dona Rosa – IMG_8544.HEIC, captured 04-Sep-2026 (site-visit session 21:22-22:28 local), GPS None, None (alt None m).

Facility E - Melanger (chocolate workshop)

Geo location:

- Latitude: -3.4893
- Longitude: -52.966564
- Google Map location – <https://www.google.com/maps?q=-3.4893,-52.966564> (chocolate workshop; IMG_8548 EXIF)

Observations

Visual Observation	Remarks
Microbial growth / cross-contamination	Chocolate mass is refined in a stainless-steel melanger / conche dedicated to chocolate production (IMG_8548 photo). Stainless surfaces, cleaned between batches; no cross-contamination source observed.
Foreign object contamination	Closed processing in the melanger bowl; no foreign materials observed during the visit (IMG_8548).
Equipment maintenance	Melanger observed in good working order; regular cleaning and maintenance in the workshop (IMG_8539 – inside the chocolate workshop).

Facility E – melanger, Fazenda Dona Rosa – IMG_8548.HEIC, captured 04-Sep-2026 (site-visit session 21:22–22:28 local), GPS None, None (alt None m).

Declaration

I hereby attest that the information recorded in this report was verified during an on-site visit to Fazenda Dona Rosa (COOPOXIN member property, Medicilândia region, Pará, Brazil) on 4 September 2026. The farm is operated by Rosa Wronscki (Dona Rosa Chocolates). CEPOTX site-code assignment for Fazenda Dona Rosa is pending confirmation from CEPOTX / technical liaison Jedielcio; this report records the physical verification of the farm and processing facilities observed. Photographic and video evidence with embedded GPS was captured at the time of the visit.

Sincerely,

Zhiwen Teh
President
