

CEPOTX site visit 8th Sept 2026

This document established record for FSVP compliance requirements of our site visit to CEPOTX facility

Supplier and visit dates

- Supplier name visited: CEPOTX
- Site name: Cleide Maris Suk
- Site code: B-06-108
- Date: 8th Sept 2026

Facilities visited

- 1 cacao fermentation facility
- 1 cacao roaster
- 1 winnowing and cracking facility
- 1 melanger (chocolate mass grinding)
- 1 cacao juice (honey) press
- 1 chocolate moulding (molds / bars)
- 1 fridge / cold-hold (tempering & storage of finished chocolate)
- 1 storage facility

Facility A - Cacao fermentation facility

Geo location:

- Latitude: -3.4140667
- Longitude: -52.6346889
- Google Map location

Visual Observation	Preventive Control	Examined	Remarks
Microbial contamination / undesirable fermentation	Fermentation in dedicated fermentation tank/box on premise; nothing else processed in the fermentation house.	Fermentation tank observed clean and dedicated to cacao; standard smell/PH/taste batch checks per farm practice.	Visual observation confirmed.
Cross-contamination with chemicals	Premise is organically certified; no pesticides or artificial chemicals on site.	No chemical containers observed in fermentation area.	Visual observation confirmed.

Photo evidence - Cacao fermentation facility (8 Sept 2026)

Facility B - Cacao roaster

Roasting process kills microbial growth; internal cacao nib temperature reaches 180°C.

Geo location:

- Latitude: -3.4140667
- Longitude: -52.6346889
- Google Map location

Visual Observation	Preventive Control	Examined	Remarks
Microbial survival during roasting	Roast until internal nib temperature reaches 180°C for 30 minutes.	Roaster observed in working order; temperature/time verified on unit.	Roasting process itself kills off microbial growth.
Equipment hygiene & maintenance	Daily cleaning; full maintenance yearly, part maintenance quarterly; repairs before next batch.	Machine observed clean and in good working order.	Confirmed.
Sealing / foreign objects	Stove sealed during roasting; regular maintenance of seals.	Equipment observed sealed during operation.	Confirmed.

Photo evidence - Cacao roaster (8 Sept 2026)

Facility C - Winnowing and cracking facility

Removes shell fragments after roasting.

Geo location:

- Latitude: -3.4140667
- Longitude: -52.6346889
- Google Map location

Visual Observation	Preventive Control	Examined	Remarks
Shell fragments in nibs	Proper cracking + winnowing equipment automates shell-fragment removal; visual inspection and sieving.	Winnower/cracker observed in use; shell removal automated.	Only cacao nibs processed at this facility.
Contamination / allergens	Clean and sanitize winnowing equipment between batches; only cacao processed (no cross-contact).	No other materials observed being processed.	Confirmed.
Personnel hygiene	Workers to wear hair mesh and gloves.	Hair mesh observed worn.	Confirmed.

Photo evidence - Winnowing and cracking facility (8 Sept 2026)

Facility D - Melanger (chocolate mass grinding)

Grinds nibs to liquid chocolate mass.

Geo location:

- Latitude: -3.4140667
- Longitude: -52.6346889
- Google Map location

Visual Observation	Preventive Control	Examined	Remarks
Metal contamination	Proper maintenance, metal detection; machine is sealed during operation.	Machine observed in good working condition; no metal fragments observed in cacao mass.	Confirmed.
Hygiene between batches	Daily cleaning; in-between uses openings sealed with covers to prevent contaminant entry.	Machine observed clean and sealed when idle.	Confirmed.

Photo evidence - Melanger (chocolate mass grinding) (8 Sept 2026)

Facility E - Cacao juice (honey) press

Extracts cacao juice from fresh pulp.

Geo location:

- Latitude: -3.4140667
- Longitude: -52.6346889
- Google Map location

Visual Observation	Preventive Control	Examined	Remarks
Microbial contamination	Regular cleaning and sanitizing of press equipment; rinse after cleaning with approved agents.	Press equipment observed clean; no visual signs of contamination.	Confirmed.
Cross-contamination with chemicals	Isolate cacao juice extraction from chemical-related processes; proper chemical storage/handling.	No evidence of cross-contamination with chemicals.	Confirmed.
Foreign objects	Use screens or filters; regular inspection of equipment.	No foreign objects observed in juice.	Confirmed.

Photo evidence - Cacao juice (honey) press (8 Sept 2026)

Facility F - Chocolate moulding (molds / bars)

Tempered chocolate mass poured into moulds.

Geo location:

- Latitude: -3.4140667
- Longitude: -52.6346889
- Google Map location

Visual Observation	Preventive Control	Examined	Remarks
Hygiene practices	Proper hygiene; gloves/masks; regular cleaning and sanitizing of moulding area and moulds.	Moulding area observed clean; no visual signs of contamination.	Confirmed.
Allergen / cross-contact	Facility only processes cacao/chocolate; allergen controls in place.	No non-cacao materials observed being processed.	Confirmed.
Foreign objects	Regular inspection of moulds and equipment; approved food-grade moulds.	No foreign objects observed in finished bars.	Confirmed.

Photo evidence - Chocolate moulding (molds / bars) (8 Sept 2026)

Facility G - Fridge / cold-hold (tempering & storage of finished chocolate)

Temperature-controlled hold for tempered/cooled chocolate.

Geo location:

- Latitude: -3.4140667
- Longitude: -52.6346889
- Google Map location

Visual Observation	Preventive Control	Examined	Remarks
Temperature control	Monitor storage temperature; maintain refrigeration equipment; temperature kept in specified range.	Fridge observed operating; temperature maintained below/within required range for finished chocolate.	Confirmed.
Contamination / odours	Separate chocolate from strong-smelling products; proper packaging and sealing.	Finished product stored sealed; no off-flavours or odours observed.	Confirmed.
Hygiene	Regular cleaning and sanitizing of storage area; inspect containers.	Storage clean; no visible damage to containers.	Confirmed.

Photo evidence - Fridge / cold-hold (tempering & storage of finished chocolate) (8 Sept 2026)

Facility H - Storage facility

Storage of raw material, packaging and finished goods.

Geo location:

- Latitude: -3.4140667
- Longitude: -52.6346889
- Google Map location

Visual Observation	Preventive Control	Examined	Remarks
Pest / foreign objects	Store materials off floor, sealed packaging; regular inspection of storage area.	Storage observed tidy; bags/packageging sealed; no evidence of pests.	Confirmed.
Cross-contamination with chemicals	Isolate food storage from chemical-related processes; proper chemical storage.	No chemicals observed in food storage area.	Confirmed.
Hygiene & housekeeping	Regular cleaning and sanitizing of storage area.	Area observed clean and organised.	Confirmed.

Photo evidence - Storage facility (8 Sept 2026)

I hereby assert the above documented observations and proposed corrective actions are true based on my physical inspection of the site.

Sincerely,

Zhiwen Teh

President

TrueTech Inc (EIN: 88-3411514)
